Wednesday, March 24, 2021. 9:00 AM – 4:00 PM

[WORKSHOP REGISTRATION HERE](#)

WITH THE USE OF INTERACTIVE PLANNING TOOLS

# A virtual and interactive **NAI-CHARM Workshop.**

communitycharm.org

## What is **CHARM?**

The Community Health and Resource Management (CHARM) platform is an interactive and collaborative mapping tool. It helps communities see how planning decisions made today impact them tomorrow.

## Interactive **PLANNING**

This is a Texas A&M program that uses a low-cost, interactive table-top interface so people can build their own towns and cities using local data about floods, habitat, critical facilities, and more. It allows over a dozen development styles.

## No Adverse Impact (**NAI**)

ASFPM's NAI approach can inform floodplain management and by extending FEMA's CRS program. Learn about NAI principles, success stories, and case studies, how they can protect communities and property owners from liability.
