

## **Cooperating Technical Partners – ASFPM CTP subcommittee Monthly Call – June 9, 2025**

Attendees: Alan Lulloff, Dave Guignet, and Joanna Rohlf

### **CTP webinars**

The US Army Corps of Engineers presented on HECRAS 2025 on June 3, 2025. We had to close out registrations since the number registered exceeded the 1000 limit for our software. Mark Forest has agreed to present on hydrology in the July to September timeframe. It was mentioned that the presentation should be basic in nature. It would be good for the subcommittee to view the content prior to the webinar.

### **CTP conversation in New Orleans**

We had people sign in using a QR code. Joanna indicated that there were 53 people in attendance. We would like to have CTPs be the focus. One engineering firm had 13 people in attendance.

Bill Brown presented on other funding options (e.g. stormwater utilities).

We then had breakout groups that tackled four questions. The summaries of items put on flip charts is attached.

### **CTP social**

The CTP social on Tuesday evening was well attended. Tom Morey with Stantec has reached out and indicated he can help with the CTP social next year.

### **Other discussion**

Dave is retiring in July. Two people have been identified as potential replacements. Brooke and Joanna will interview them.

Laura's last day was May 23<sup>rd</sup>. Joanna received an email listing who is replacing some of the people that have left that she shared.

Joanna indicated that Kansas is planning to have training on 2D modeling for non-engineers.
